

Welcome to Advanced Scene Manager.

The documentation is available either online:

<https://lazy-solutions.github.io/AdvancedSceneManager>

Or offline, in zipped form:

To view offline docs, the easiest way is to click 'Open docs (double click me)'. This will automatically extract zip file, if needed, and open '/docs/_site/offline-index.html' file in browser. Note that the open docs file may not open if your project is using symlinks (seems to be a bug with OnAssetOpenAttribute, a script recompile seems to fix it though).

Otherwise, docs.zip can be extracted manually, you can then open '/docs/_site/offline-index.html' to view offline website in browser.
